

# Customer Service Inspection

An inspection must be performed before water (6 months), electric service and/or gas service can be turned on at a vacant residential or commercial building. Items to be looked at during inspection include, but are not limited to, water heater(s), electrical box, water and sewer connections, and any other possible health or safety issue. The cost for an inspection is **\$35.00** and must be paid prior to the inspection. Inspection will usually be completed within 4 hours.
